DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This label must be in possession of the user at the time of pesticide application. **Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.**

ALFALFA & CLOVER (Seed Only)

Aphids, Lygus Bugs, Thrips, Spider Mites, Weevils: Apply 3.9 to 6.4 ounces (0.06 to 0.1lb. a.i.) per acre. Apply in a minimum of 5 gallons of water per acre by air equipment and a minimum of 20 gallons of water by ground equipment.

Do not apply more than 6.4 ounces (0.1lb.a.i.) per acre per treatment. Do not make more than 3 applications in a crop year. Maintain a minimum of 21 days between Discipline 2EC treatments.

Do not apply by ground equipment within 25 feet or by air within 150 feet of lakes; reservoirs; rivers; permanent streams, marshes, or natural ponds; estuaries and commercial fish farm ponds.

For aerial applications, the spray boom should be mounted on the aircraft so as to minimize drift caused by wingtip or rotor vortices. The minimum practical boom length should be used and must not exceed 75% of the wingspan or rotor diameter.

Make aerial or ground applications when the wind velocity favors on target deposition (approximately 3 to 7 MPH). Do not apply when wind velocity exceeds 7 MPH. Follow the spray drift precautions on the EPA registered label. Risk of exposure to aquatic areas can be reduced by avoiding applications when wind direction is toward the sensitive areas. Do not cultivate within 10 feet of the aquatic area so as to allow growth of a vegetative filter strip to alleviate drift and mitigate runoff.

RESTRICTIONS:

- Do not apply more than 19.2 ounces (0.3 lb. a.i.) per acre per season.
- Do not cut current year's treated Alfalfa Seed or Clover Seed crop for hay or forage. Do not use treated seed or crop parts for food, feed or oil purposes.

RE: Special Local Need Registration (SLN) for Discipline 2 EC, EPA Reg. No. 5481-517, to Control Listed Insects in Alfalfa and Clover Grown for Seed, Manufactured by AMVAC, SLN #ID-040009.

Dear Sir:

Enclosed is a Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), Section 24(c) Special Local Need registration (SLN) for Discipline 2 EC, EPA Reg. No. 5481-517, to control listed insects in alfalfa and clover grown for seed, manufactured by AMVAC, SLN #ID-040009. This registration is a "Me Too" SLN, identical to Idaho SLN # ID-900006 allowing the use of Capture 2EC on alfalfa and clover grown for seed (enclosed is a copy of SLN #ID-900006). Both insecticides are a 2% emulsifiable concentrate formulation of bifenthrin. Performance data was supplied in both SLN packages.

This label's use language and prohibitions are identical to SLN #ID-900006, with some formatting differences. Based on the above information we believe the use of this product will result in an effective treatment without adverse environmental impacts. However, if you have any questions about this SLN, contact me at 208-332-8593.

Sincerely,

George Robinson
Pesticide Program Manager
